

As an XM satellite radio consumer, I must urge the FCC to reject the NAB's petition 04-160. XM has been a blessing to my musical and informational experiences in my car. XM provides wonderful programs that I cannot find elsewhere. Besides the fact that XM makes me so happy, accepting the NAB's petition to stop XM's locally-oriented broadcasts would be a direct impairment on competition within the industry. Competition fuels the industry's progress, and the NAB should stop complaining and start innovating to compete with XM. By hindering XM, it would ultimate stunt the industry's technological advancement that would result with a free market. Please consider the effects on the industry and consumer welfare before considering this ridiculous petition. Sincerely, Christine Green
